**Note** that the starting station data for NYC / Manhattan is in another data set - recommend only viewing Jersey City areas for this compare.

. These interactive maps allow visually connecting where rides start and end. Select either a starting station or an ending location (station may not exist) and the other map will filter based on your selection.

. Additionally, you can see where rides end but there aren't "stations" by the comparing where additional markers are on the Ending Station map that do no exist on the Starting Station map. This can be a starting point for considering where to put additional stations.

2021-2022 Ride Count by Ending Station
